***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirabayashi et al (Hirabayashi).

Hirabayashi suggests the use of oxazoline compound in column 8, lines 20-25 in a photothermographic material containing photosensitive silver halide, an organic silver salt, reducing agent and binder (abstract). Therefore, Hirabayashi renders the invention as claimed prima facie obvious. Therefore, the reference suggests and makes obvious the claimed subject matter. In re Malagari, 182 USPQ 549.

3. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirabayashi et al as applied to claims 1, 4-5 above, and further in view of Koyama et al (Koyama).

The compound having 2-oxazolyl group has been taught in Koyama in column 2 formula A. In column 10, lines 13-30, it is disclosed that the compound is useful in a variety of recording material including thermal sensitive image forming material and silver halide photographic light-sensitive material in term of producing an information recording medium having high resistivity to damage formed before, during and after processing. It would have been obvious to include the compound taught in Koyama in the material of Hirabayashi for same reason, and thereby provide a material as claimed.

**Conclusi n**

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thorl Chea whose telephone number is (703)308-3498. The examiner can normally be reached on M-F (9:30 - 6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet C Baxter can be reached on (703)308-2303.
